

NOTE
 F30 REQUIRES NON INTERRUPTED 24VAC SUPPLY TO ITS ACTIVE / NEUTRAL TERMINALS
 A 24VAC ACTIVE APPLIED TO THE F30 AUX TERMINAL WILL CAUSE THE F30 TO SWITCH
 THE PUMP ON.

NOTE
 THE F30 CAN DIRECTLY DRIVE PUMP MOTORS TO 0.75kW (1HP). FOR LARGER MOTORS
 USE THE F30 TO DRIVE A CONTACTOR COIL WITH THE CONTACTOR DRIVING THE PUMP
 AS DRAWN ABOVE.

NOTE
 THE F30 -24 FLOW SWITCH DRAWS ~75mA, SO THE TRANSFORMER SHOULD BE
 SIZED TO DELIVER 150mA CONTINUOUS AT 24V
